

YOUR RELIABLE PARTNER IN

Replacement pumps

Genuine spare parts
24/7 support and service

Are you experiencing performance issues or repeated failures with your existing pumps?

At some point, it is more cost efficient to replace a pump instead of repair. Therefore, Hamworthy Pumps can replace your old, worn pumps quickly and efficiently - regardless of the pump brand.

We can replace your existing Hamworthy Pumps or offer a cost efficient solution to replace a pump of any other brand which will include the replacement pump, the adaptors and fittings to enable the existing pump to be changed efficiently.

We take care of pump solutions along with the subsequent service to lower your operational costs associated with pump maintenance.

Replacement pumps

Model C2G

Vertical in-line overhung pumps with single suction impeller, radially split casing with rigid coupling options.

Model CG

Vertical inline single stage pump in single suction impeller, radially split casing with flexible spacer coupling and hydrodynamic sleeve bearing.

Model CA

Vertical in-line between bearing pumps with double suction impeller, axially split casing with rigid coupling options.

Model CB

Vertical in-line between bearing pumps with double suction impeller, axially split casing with flexible coupling options.

Model Dolphin

Vertical in-line single-stage single/double suction, overhung pumps with rigid coupling, radially split. Option for external bearings/flexible coupling.

Additional solutions

In addition to standard seawater and freshwater applications for centrifugal pumps, we can also supply replacement pumps for most marine applications including screw, turbine, gear and progressive cavity type pumps.

Five good reasons to choose Hamworthy Pumps

Fast delivery

At Hamworthy Pumps, we guarantee fast delivery. We have a large warehouse in Singapore with genuine spare parts. These ready stocks are available for immediate despatch to fulfil urgent request from customers globally.

High-grade materials

A pump made by Hamworthy Pumps is made of high-grade materials. The pumps can be manufactured from nodular cast iron, stainless steel, Ni-Al Bronze, duplex and super duplex. Higher grade materials ensure a long lifetime and lower spares consumption.

The market's most compact built-in dimensions

A pump made by Hamworthy Pumps has the market's most compact built-in dimensions.

More than just a supplier

At Hamworthy Pumps, we offer pumps, parts and services and ensure an optimal pump solution. When you order a replacement pump, we see it as our obligation to ensure that you get exactly the pump for your application.

We analyse the customer needs and put together a solution that fits the application. Our pumps are easy to install. Our services team can support with the installation when required.

High efficiency - low energy consumption

By providing the most efficient pump solutions, we ensure that the pump in your application have the lowest energy consumption.

SERVICE
